EDAERO Cookie Policy

Applicable to www.eadaero.com and crews.eadaero.com

Version 2.0 | Effective Date: 1 October 2026

1. Scope

This Cookie Policy explains how **EDAERO LLC** uses cookies and similar technologies on **www.eadaero.com**, **crews.eadaero.com** and related EDAERO Services.

This Policy should be read with the Privacy Policy. The live cookie-preference center displayed on EDAERO Services forms part of this Policy and identifies the currently active cookie categories and, where available, the current vendors and technologies.

2. What Cookies Are

Cookies are small text files or similar identifiers stored on or accessed from your device when you visit a website or use an online service. Similar technologies may include local storage, pixels, SDKs and comparable tools.

3. Cookie Categories

3.1 Strictly Necessary Cookies

These technologies are required for functions such as security, authentication, session management, fraud prevention, load balancing, account access and remembering privacy choices. Where legally permitted, they may operate without consent because the service cannot function properly without them.

3.2 Preference and Functionality Cookies

These technologies remember choices such as language, display settings or other preferences. Where applicable law requires consent, they are disabled until consent is provided.

3.3 Analytics and Performance Cookies

EDAERO may use analytics technologies, including **Google Analytics**, to understand how visitors use EDAERO Services, diagnose performance issues and improve content and functionality. Where applicable law requires prior consent, analytics technologies are not activated until consent is provided.

3.4 Advertising or Marketing Cookies

EDAERO will use advertising, retargeting or cross-site marketing technologies only where actually implemented and lawfully configured. Where consent or opt-out rights apply, EDAERO will provide the required controls.

4. First-Party and Third-Party Technologies

First-party cookies are set by EDAERO Services. Third-party technologies may be provided by service providers such as analytics, payment, security, communications or infrastructure vendors.

Third parties may process information under their own privacy terms where they act independently. EDAERO selects and configures providers with regard to applicable privacy obligations.

5. Session and Persistent Cookies

Session cookies generally expire when the browsing session ends. Persistent cookies remain for a defined period or until deleted. Duration depends on the cookie's purpose and provider and is displayed, where technically available, in the live cookie-preference center.

6. Consent and Preference Management

Where law requires consent for non-essential cookies, EDAERO will request that consent before activating them. The consent interface should provide meaningful choices such as:

- **Accept All**;
- **Reject Non-Essential**;
- **Manage Preferences**.

Users may change or withdraw cookie consent through the cookie settings control available on EDAERO Services. Withdrawal does not affect processing that was lawful before withdrawal.

7. Browser Controls

Most browsers allow Users to block or delete cookies. Blocking strictly necessary cookies may prevent account login or other EDAERO functionality from working correctly.

8. Global Privacy Control and U.S. Opt-Out Signals

Where applicable U.S. privacy law requires recognition of a legally valid opt-out preference signal, EDAERO will process supported signals such as Global Privacy Control in accordance with the applicable law and technical configuration.

9. International Users

Cookie and tracking rules differ by jurisdiction. EDAERO applies consent or opt-out controls based on applicable law, including relevant EU/EEA and UK requirements for non-essential cookies and applicable U.S. state privacy rights.

10. Changes to This Policy

EDAERO may update this Policy to reflect changes in technology, vendors or law. The effective date of the published Policy identifies the current version.

11. Contact

Questions about cookies or privacy may be submitted through the contact or privacy channel published on **www.eadaero.com**.

Current Cookie Inventory Method

Because the exact cookies and identifiers can change when EDAERO updates hosting, analytics, security or Platform software, the authoritative current inventory is the live cookie-preference center generated from the active production configuration.

Category	Typical purpose on EDAERO	Consent status
Strictly Necessary	login, session, security, consent record, fraud protection	No consent where legally exempt
Preferences / Functionality	remember User choices	Consent where required
Analytics / Performance	usage measurement and service improvement, including Google Analytics where active	Prior consent where required
Advertising / Marketing	retargeting or marketing measurement only if activated	Consent / opt-out as required
